

## >> Aluminium Flybridge Hatch – Passofly.

Aluminium Flybridge access Hatch suitable for any type of motor boat or yacht.

The Passofly hatch consists of an upper and lower aluminium frame that can be painted any colour chosen by the customer, and smoke grey or opal plexiglass.

It is fitted with a gas spring for easy opening and closing. A special hold-open device can be supplied on request to hold the window open and prevent it accidentally closes.

It is fitted with aluminium hinges, an EPDM sealing gasket and standard inside delrin handles reinforced with a fibre glass coating. Steel or aluminium handles are available on request.

The outside handles can be in fibreglass reinforced delrin or steel and can be placed flush if desired.

Customised solutions can be designed to meet customer needs.

The design and functionality of this non-hinged hatch make it ideal for installation on any type of boat, adding elegance and style.
