

>> “Silver” Aluminium Hatch.

Hatches for yachts and motor boats made using only the best materials:

- Extra-thick light anodised aluminium alloy,
- Methacrylate plexiglass,
- Neoprene sealing gaskets,
- Fibreglass reinforced nylon handles,
- Austenitic stainless steel springs, screws and pins.

The design of the frame guarantees:

- **maximum bending resistance,**
- **maximum watertightness,**
- **minimum protrusion on deck.**

Adjusting the opening height is especially simple: by **moving the cover, the hatch can be held open in any position from 0 to 180 degrees.**

No stays are needed (stoppers, telescopic shafts, etc.), no knobs, no pre-set positions.

A large stainless steel stabilising spring supports the weight of the cover, preventing its accidentally closing.

N.B.: items 218.200 and 218.205 (340 x 195 mm) are not equipped with this spring, given the reduced size and weight of the cover.

All hatches can be held open in a convenient **“half-open position”** which ensures **efficient cabin ventilation** but prevents the cover from being opened from the outside.

- >> PROFILE MAX 40 MM ABOVE THE DECK
- >> MADE IN A LIGHT ALUMINIUM ALLOY, SILVER ANODISED WITH EXTRA THICKNESS OR PAINTED ON REQUEST
- >> PLEXIGLASS STANDARD COLOUR IS SMOKE GREY
- >> CAN BE HELD HALF OPEN FOR BETTER VENTILATION
- >> CAN BE HELD OPEN IN ANY POSITION
- >> FLYSCREEN, DARKENING PANEL AND FINISHING FRAME AVAILABLE ON REQUEST
- >> OUTSIDE FOLD-DOWN HANDLES AVAILABLE ON REQUEST
- >> CUSTOM SIZE HATCHES CAN BE SUPPLIED FOR MINIMUM ORDER QUANTITIES
