

>> Bimini kit.

Bimini kit for Yachts and Motor Boats. Quick and easy to assemble and dismantle, the kit consists of four carbon fibre tubes that are fixed on the four sides of the boat.

The customer can choose between two different installation modes:

- on deck by means of special sockets which the tubes are inserted into; when not in use the tubes are easily removed by simply rotating them;
- on the side by means of special fold-down supports to be fixed on the boat flank.

A special adjusting system allows the canopy to be positioned at any angle to provide shade to any part of the boat.

- >> QUICK AND EASY TO ASSEMBLE
- >> LIGHTWEIGHT AND ELEGANT
- >> CARBON FIBRE TUBES
- >> TUBES AVAILABLE WITH 44 MM (ALSO DIVISIBLE VARIATION) OR 60 MM DIAMETRE
