

>> Weathertight Hinged Door.

The door structure and frame are in fibreglass and can be painted any colour chosen by the customer or the same colour as the boat.

It is perfectly weathertight, thanks to the special sealing gasket and the conical pins on the sides which exert pressure on the gasket, ensuring the door is securely closed.

The door is easy to open manually, thanks to the concealed hinges, enhancing its seamless appearance.

It is fitted with a standard aluminium handle on both the inside and outside and is locked with a key from both the inside and outside.

Its light weight, elegant details and functionality make this weathertight door a simple yet essential product.
