

>> “Silver” Aluminium Hatch.

Hatches for sailboats with a robust frame profile, maximum bending resistance, maximum watertightness and just 40 mm protrusion from the deck.

They consist of a frame and window in silver anodised aluminium or painted any colour chosen by the customer, smoke grey plexiglass, marine neoprene sealing gasket, austenitic stainless steel springs, screws and pins and fibreglass reinforced delrin handles.

The opening height can be easily adjusted with no need for telescopic shafts or other supports: by moving the cover, the hatch can be held open in any position from 0 to 180 degrees.

A large stainless steel stabilising spring supports the weight of the cover, preventing it accidentally closing. N.B.: items 218.200 and 218.205 (340 x 195 mm cut-out) are not equipped with this spring, given the reduced size and weight of the cover.

- >> PROFILE MAX 40 MM ABOVE THE DECK
- >> MADE IN A LIGHT ALUMINIUM ALLOY, SILVER ANODISED OR PAINTED ON REQUEST
- >> CAN BE HELD HALF-OPEN FOR BETTER VENTILATION
- >> THE WINDOW CAN BE HELD OPEN IN ANY POSITION
- >> OUTSIDE FOLD-DOWN HANDLES, FLYSCREEN, DARKENING PANEL AND FINISHING FRAME AVAILABLE ON REQUEST
- >> CUSTOM SIZE HATCHES CAN BE SUPPLIED FOR MINIMUM ORDER QUANTITIES
