

>> “Slim Line” Aluminium Hatch.

A range of hatches for yachts and motor boats specifically designed for anyone who wants to combine maximum safety with minimum overall dimensions, quality and aesthetics.

“Slim Line” hatches sit just 25 mm above the deck, offering unbeatable quality:

• **best materials:**

light aluminium alloy with 30 micron anodising, 10 or 12 mm thick methacrylate plexiglass, marine neoprene, fibreglass reinforced nylon and AISI 316L steel;

• **excellent sturdiness:**

thanks to a robust frame profile, specifically designed to offer high resistance to bending;

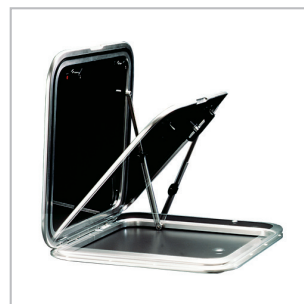

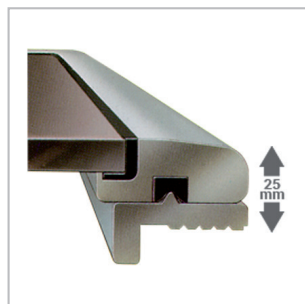

• **perfect watertightness:**

thanks to accurate welding of all the frames and perfect coupling of the fixed and mobile parts;

• **seamless finish:**

all surfaces and corners are carefully rounded.
