

>> Electric Stern Door with retractable Handrail.

Fibreglass stern pantograph door for yachts and motor boats painted the same colour as the boat, with a steel handrail, that has been specially designed for the pilot bridge.

Opening and closing are electrically controlled by buttons on the side of the door.

The retractable handrail is very functional and aesthetically pleasing. It retracts when the door is closed and unfolds when it is opened.

The door is also fitted with a release handle, so it can be opened manually in the event of a power failure.

Once again aesthetics combine with functionality to deliver a signature Nemo product because, as always, it is the details that make the difference.

- >> ELECTRIC OPERATION
- >> HANDRAIL RETRACTS WHEN DOOR IS CLOSED
- >> DIMENSIONS AND COLOURS CAN BE CUSTOMISED ON REQUEST
- >> OCCUPIES MINIMUM SPACE IN THE WALKWAY
- >> MANUAL OPERATION IN THE EVENT OF A POWER FAILURE
