

>> “Eco” Aluminium Flybridge access Hatch.

Flybridge access hatch for yachts and motor boats (“Passofly”), consisting of an aluminium frame that can be painted any colour chosen by the customer, smoke grey or opal plexiglass.

The polished or painted stainless steel hinges are flush with the plexiglass outer surface, with no protrusion.

The Passofly hatch is fitted with a gas spring for easy opening and closing. A special hold-open device can be supplied on request to hold the window open and prevent it accidentally closes.

EPDM sealing gasket and standard delrin inside handles reinforced with a fibre glass coating. Steel or aluminium handles are available on request. The outside handles can be in fibreglass reinforce delrin or steel and can be placed flush.

Customised solutions can be designed to meet customer needs.

The design and functionality of this non-hinged hatch make it ideal for installation on any type of boat, adding elegance and style.
