

>> “Seasil” protective spray for door and hatch sealing gaskets.

Specially for sealing gaskets on boat doors, hatches and windows.

- Salt water resistant.
- Protects sealing gaskets.
- Prevents sticking.
- Improves sealing tightness. .

With eco-friendly propellant.

Seasil is a new product developed by Nemo to be sprayed once a month on the sealing gaskets of doors, portholes and hatches. It lubricates and

protects them from abnormal ageing which over time might lead to undesired and dangerous water infiltration. It also prevents the gaskets sticking to the glass.

Seasil is salt water resistant and, when applied regularly, improves the sealing tightness of any type of gasket, keeping it soft and spongy.

It is sold in practical 400 ml spray bottles; the jet is directed only where it is needed, so your hands or fragile parts of the boat are always clean.

- >> IDEAL FOR SEALING GASKETS
- >> SALT WATER RESISTANT
- >> PREVENTS STICKING
- >> IMPROVES SEALING TIGHTNESS
