

## >> “Seasil” protective spray for door and hatch sealing gaskets.

---

Seasil is a lubricant for sealing gaskets on hatches, portholes and doors. Sprayed once a month on the sealing gaskets, it protects them from abnormal ageing which over time might lead to undesired and dangerous water infiltration.

When applied regularly, it improves the sealing tightness of the gasket, keeping it soft and spongy, and prevents it from sticking to the glass.

It is sold in 400 ml spray bottles.

- >> CONTAINS ECO-FRIENDLY PROPELLANT
- >> IDEAL FOR ALL SEALING GASKETS
- >> PREVENTS STICKING
- >> PROTECTS SEALING GASKETS AND IMPROVES THEIR TIGHTNESS
