

>> Stainless Steel Portlights for Motor Boats and Luxury Yachts over 24 metres.

Nemo has produced a new range of portlights for boats over 24 metres.

This range includes round, oval, elliptical and rectangular portholes for all types of luxury yachts and large motor boats. A vast choice of standard sizes is available, while customised models can be produced to meet specific customer requirements.

All products undergo stringent testing, so the raw materials must be of the highest quality, certified and accompanied by a certificate of origin.

In designing these portlights, Nemo has developed new features that improve both quality and safety: fold-down handles with no protrusion that might represent an obstacle, a double sealing gasket on the porthole and the storm cover for total watertightness and a knob to keep the window open in any position, preventing it from accidentally closing. All these features combine efficiency with passenger safety.

All portholes are approved by RINA and in compliance with MCA. On request, additional certificates can be provided issued by other organisations or for other flags.

A variety of optionals are available to optimise use: fold-down handles, optical alarms, removable steel or aluminium storm cover, and a stay for the storm cover.

Today, the most prestigious shipyards choose Nemo portholes, thanks to their safe mechanics and innovative design, and the fact that they blend in effortlessly with the sleek, modern designs of their boats.

The staff at Nemo is always on hand to give you any additional information or help you may require, assisting in the selection of the most suitable model, installation and even designing new projects. Continuous support, accuracy and prompt deliveries ensure excellent after-sales assistance.

- >> FOR CHARTER OR LEISURE NAVIGATION
- >> STANDARD AND CUSTOM DIMENSIONS AVAILABLE, ACCORDING TO SHIPYARD REQUIREMENTS
- >> DIFFERENT CERTIFICATIONS ACCORDING TO BOAT CLASSIFICATION (RINA, LLOYD'S, BUREAU VERITAS, MCA, ABS) AND TYPE OF NAVIGATION (LEISURE, CHARTER WITHIN 60 MILES OR CHARTER UNRESTRICTED)
