

>> Stainless Steel Portlights.

Watertightness, resistance, adaptability and elegance.

Made in AISI 316L stainless steel, Nemo Inoxline portlights for yachts and motor boats guarantee longer duration.

The closed-cell neoprene sealing gaskets offer complete watertightness.

Windows can be in plexiglass or glass, according to customer requirements.

The new patented hinge locking system ensures the

porthole can be held open in any position.

On request, our portholes can be supplied complete with a key controlled locking system to prevent any undesired opening.

Easy to fit.

The portlights are quick and easy to install on the hull and the telescopic system makes them suitable for any bulkhead thickness.
