# QuickGroup

Quick Group, international leader in the design, production, and sale of nautical equipment and complex integrated systems for yachts and superyachts, operates in more than 110 countries worldwide.

From the beginning, the Group has stood at the forefront of technological advancement, pursuing an ambitious goal: to promote a short, sustainable, and entirely Made in Italy supply chain, aimed at enhancing the pleasure of boating through cutting-edge integrated solutions.

This vision is embodied by six iconic and technologically advanced brands - MC<sup>2</sup>, Sanguineti, Quick Nautical Equipment, Quick Marine Lighting, Xenta, and Nemo - each representing the highest expression of Italian excellence and innovation.

Headquartered in Ravenna, with three production sites in Italy and logistics and commercial branches in the United States and the United Kingdom, Quick Group continues to strengthen its position as an international benchmark for innovation, quality, and reliability, a true hub of excellence for the nautical sector.

The Group has been working in partnership with Fondo Italiano d'Investimento SGR and Armònia since 2022.

Nemo, brand of Quick Group, stands out as an Italian excellence that skillfully blends tradition and innovation, specialized in tailor-made solutions for powerboats and sailboats located in one of Italy's most prestigious nautical districts.

Nemo oversees the complete production cycle, ranging from design to material selection, manufacturing, assembly, and rigorous quality control. Its portfolio includes a wide range of products, including doors, portlights, hatches and non-hinged hatches, flybridge hatches, and much more.

Over the years, it has become internationally recognized for its quality and reliability with its "tailor-made" approach, providing customized solutions through a thorough analysis of the specific needs of customers.

# BEYOND THE ORDINARY

Beyond the ordinary, up to new heights by masterfully blending Italian craftsmanship with cutting-edge innovation. Nemo meticulously manages every step of the production process to ensure unmatched quality, and an innovative edge.

## TAILOR-MADE APPROACH

Nemo's team versatility shines through the "tailor-made" approach, providing customized solutions through a thorough analysis of the specific needs of customers.

## MATERIAL SELECTION

Material selection is a distinctive feature of the production, employing the finest materials and advanced technologies to craft welding-free steel products, stainless steels with preserved luster, and aluminum and carbon products with top-notch performance.

## TECHNOLOGY AND PERFORMANCE

Each product from Nemo combines technology, beauty, and performance, ensuring satisfaction for shipowners and nautical yards. The passion of our technicians, meticulous attention to detail, and active collaboration with major nautical yards confirm the nature of the products, designed for and with the customer.

## IN-HOUSE PROCESSING

At Nemo, we carry out a range of in-house mechanical processes to ensure top-quality production. Our capabilities include **laser cutting department**, where we precision-cut stainless steel 316L sheets, internal **painting department** that uses a wet-on-wet technique and in-house **pressing operations**, used for creating components such as portholes and door frame punchings.

The **cleaning process** involves mechanical treatment to remove impurities from stainless steel, which is crucial for maintaining high quality and durability. Following cleaning, we perform mechanical polishing to achieve a perfectly smooth and glossy finish through **anthropomorphic polishing arms**.

Additionally a **salt spray chamber** is used to test product resistance and durability and simulate years of marine wear in just a few days.

## DOORS

Nemo Industrie offers a range of high-quality doors for yachts and motorboats, including pantograph, sliding, and engine room doors, all designed for durability and ease of installation.

All doors offer customization to match any yacht's style and meet the specific needs of luxury vessels.

Pantograph doors, available in fiberglass (GRP) and aluminum, are custom-built, corrosion-resistant, and ready for quick installation, with options for manual, semi-automatic, and fully automatic operation.

Sliding doors, crafted from stainless steel or aluminum, feature monolithic or laminated tempered glass and adjustable tracks, with both manual and electric versions available, ensuring safety and seamless integration.

Engine room doors are made from high-quality aluminum, conforming to RINA "CE" standards, with a unique design that allows for quick installation and secure sealing.

Sliding companion way doors, completely custom made, in fiberglass, stainless-steel or aluminium material provided with monolithic or laminated tempered glass or PMMA, according to customers' requirements.

## PORTLIGHTS

Nemo offers a wide range of high-quality portlights, combining durability with elegant design.

The selection includes both stainless steel and aluminum portlights, providing both style and functionality to complement any boat.

## HATCHES / NON-HINGED HATCHES FLYBRIDGE HATCHES

Nemo offers a wide range of hatches designed to meet the needs of any type of yacht.

Options include stainless-steel hatches, aluminum hatches in Silver and Slim series, aluminum flush-deck hatches available in Slim and Easy models, and aluminum or stainless-steel flybridge hatches. Each hatch is engineered for durability, ease of use, and seamless integration with the boat's structure.

## BIMINI KIT FOR POWERBOATS

Easy and quick to assemble and disassemble, the kit includes a variable number of carbon fiber tubes that can be fixed at different locations on the boat, according to the crew's preference.

Customers can choose between two different installation modes:

On deck: This installation uses special sockets where the tubes are inserted. When not in use, the tubes can be easily removed by simply rotating them.

On the side: This installation uses special fold-down supports that are fixed to the boat's flank. A special adjusting system allows the canopy to be positioned at any angle to provide shade to any part of the boat.
